

April 27th, 2017 - "Life in a Wetland" presented by North Durham Nature's Cara Gregory - Uxbridge

Cara Gregory gave the most interesting talk on the work she does at the Nonquon Environmental Education Centre. She took us through the year with examples of who comes there, what they might see and what they do. Shifting gears, we learned about the wetland and other habitats that surround the Centre, what lives there and the trials and triumphs they face. The evening ended with a great hands-on demonstration where we got to handle and/or see a Grey Tree Frog, Garter Snake, Eastern Red Spotted Newt and Snapping Turtle. What a great talk! Thx Cara.
